8. <http://humrep.oxfordjournals.org/content/15/3/637.long> 450 men in Shanghai, Edinburgh and Hong Kong and 493 in Cape Town surveyed about male contraception. Majority of men welcomed new male methods. 44-83% said they would use male pill. Pill was more acceptable than injection, and more than implant (except in Shanghai). Hong Kong least acceptance of new male methods, but higher use of condoms. Women surveyed said male pill was a good idea (70% overall, and 90% in S. Africa and Scotland). Only 2% of women said they would not trust partner to use contraception.
